

REMARKS

The amendments in Paragraph 6 of the specification simply insert the publication number of an application originally identified only by serial number, and remove a now-superfluous reference to the corresponding International Application. Similarly, the amendment in Paragraph 7 inserts the publication number of an application originally identified only by serial number.

The first amendment in Paragraph 20 is a correction of a minor clerical error, the need for which is apparent from Office records. The list of patents and applications in this Paragraph is stated to be of E Ink and MIT patents relating to electrophoretic displays. U.S. Patent No. 6,249,721 is not assigned to either E Ink or MIT and does not relate to this technology. Hence, correction is obviously required, and Office records show that the correct Patent No. 6,249,271 must be intended. The second amendment in Paragraph 20 simply deletes a repeated publication number.

The amendments in Paragraphs 27, 32, 33 and 45 are corrections of minor drafting errors, the need for which is, in each instance, obvious from the context.

The first amendment in Paragraph 64 is a correction of a sentence from which one or more words have obviously been omitted, and the amendment conforms the language of this sentence exactly to that of Paragraph 60. The second amendment in Paragraph 64 is by way of clarification; upon reconsideration, it appeared to the undersigned attorney that the rather terse language of the relevant sentence might be somewhat confusing and that the language now proposed would be substantially clearer.

The amendment in Paragraph 66 is a correction of a minor clerical error, the need for which is apparent from the context.

Finally, the first two amendments in Paragraph 78 correct an inadvertent mis-statement; although WO 01/07961 and WO 00/67327 have previously been mentioned in the specification, 2002/0106847 has not. The last amendment inserts the patent number corresponding to the publication number originally given.

No new matter is introduced by any of these amendments.

Zehner et al.
Serial No. 10/711,420
Preliminary Amendment of November 2, 2005
